

California Housing Analysis

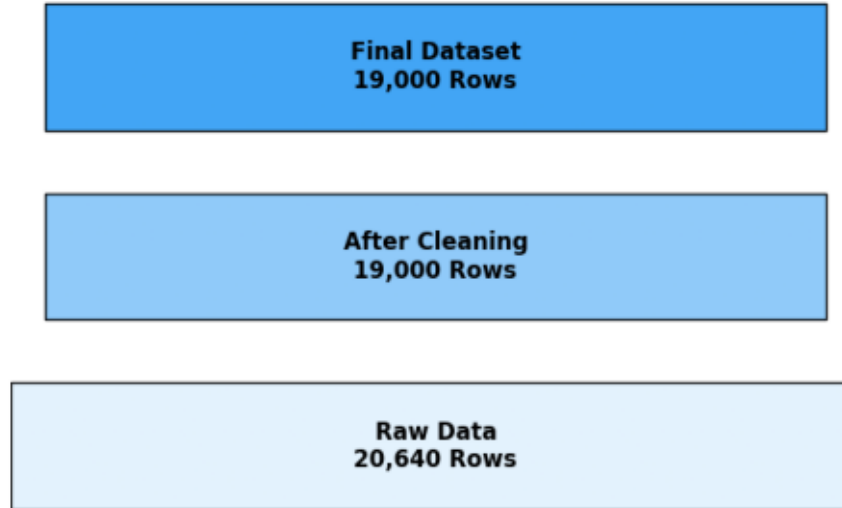

Detailed Project Report

Generated by Antigravity

The Data Landscape

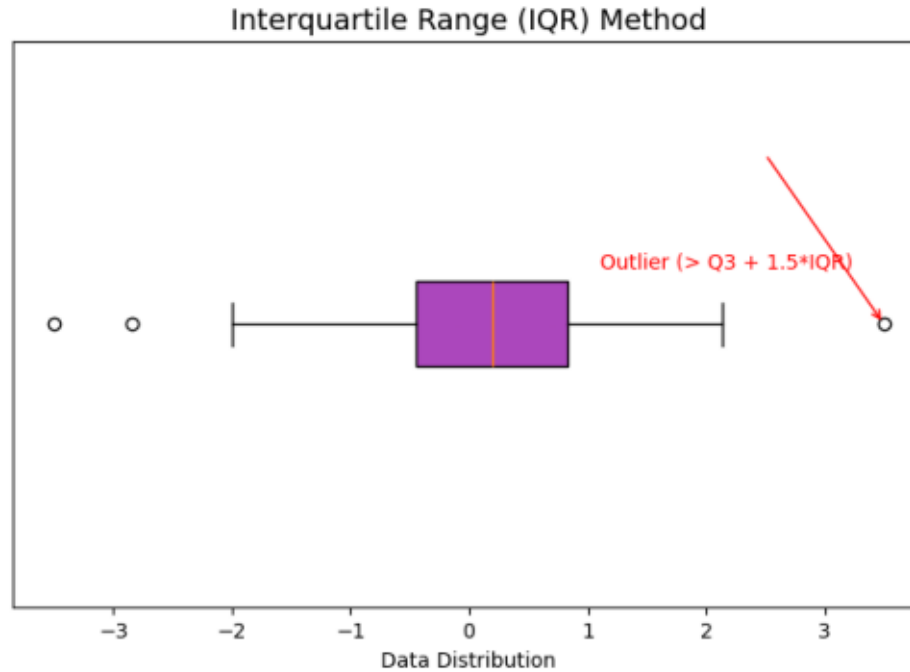

Objective: Inspect and Clean 20,640 records.

Data Processing Funnel

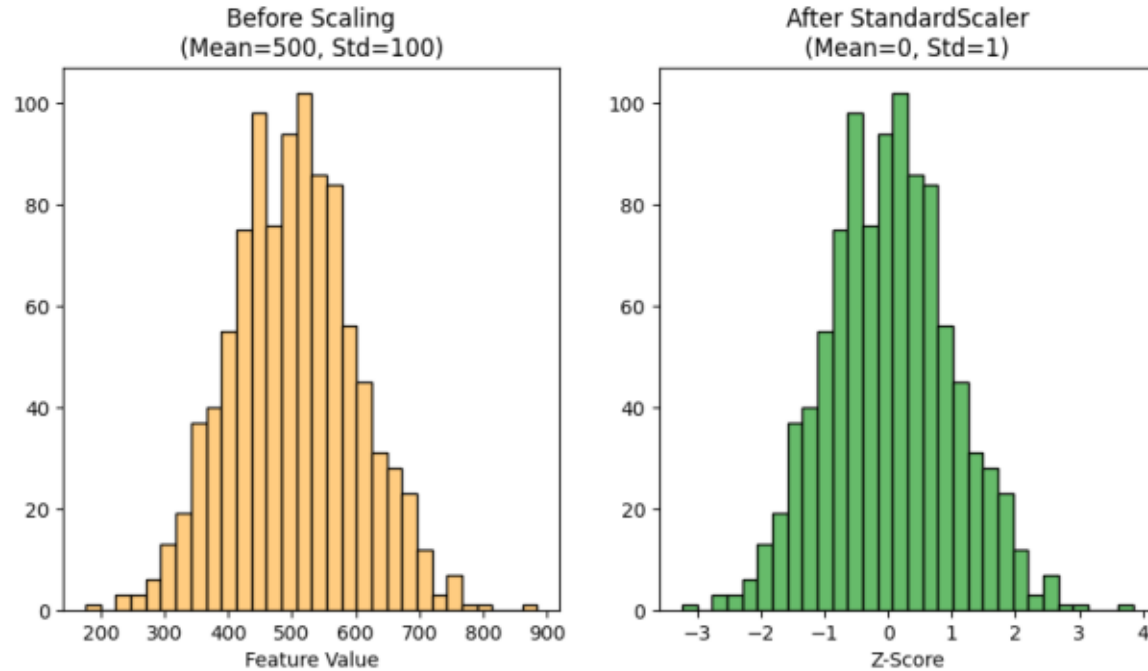

Outlier Strategy: IQR

Robust method resisting extreme values.

Feature Engineering: Scaling

Standardizing inputs for ML performance.

Conclusion

- Dataset Cleaned: ~1,500 Outliers Removed
- Features Scaled: Mean=0, Std=1 Verified
- **Ready for Model Training**
